

Credit Card Essentials

for Microsoft Dynamics™ AX 2009

Secure Your Credit Card Payments and Use Your Processor

Red Maple's Credit Card Essentials goes beyond the standard Microsoft Dynamics™ AX credit card functionality and gives companies more security, adds returns management functionality and the ability to process orders in currencies other than US Dollars.

Business Situation

Companies that process credit card transactions within Microsoft Dynamics™ AX need efficiency in their processing, reliable data security and the ability to process orders in more currencies than just U. S. Dollars.

As an integrated solution within Microsoft Dynamics™ AX, Red Maple's Credit Card Essentials integrates with a variety of credit card processors. Companies now have a greater choice when it comes to processing transactions in the United States, Canada and abroad.

Secure Payment Transactions

Red Maple's Credit Card Essentials ensures that credit card data is secure during the storage and transmission of credit card data by including application encryption out of the box. With Red Maple's Credit Card Essentials, no additional configuration is necessary to:

- Ensure sensitive credit card data is never stored unencrypted
- Restrict all users from seeing sensitive credit card data
- Provide security features required for PCI compliance for applications processing credit cards

Solution

With Credit Card Essentials for Microsoft Dynamics™ AX, companies can have additional processors, ensure that payment transactions are secure, and process returns efficiently.

Payment Application Best Practices (PABP) Certification

Red Maple's Credit Card Essentials includes Payment Application Best Practices (PABP) certification which conforms to Visa's Processor Application Best Practices (PABP). And all application encryption uses the .Net 2.0 encryption framework which means that data is secure without any additional database implementation or setup.

Transact Business in Multiple Currencies

Red Maple's Credit Card Essentials includes additional tools and processors for companies that generate business outside the United States. Red Maple's

Credit Card Essentials broadens the number of countries and currencies where companies can accept credit cards by providing additional country specific processors and features.

Credit and Void Functionality

Red Maple's Credit Card Essentials improves customer service and workforce productivity by adding functionality to allow you to process sales, credits and voids without having to perform custom programming.

- Avoids the need to create duplicate entries to reverse a credit card return by allowing companies to directly credit or void transactions that occur within their business.
- Controls the cash flow and business process by not allowing credits without the appropriate credit note and referencing sales order.

Supported Processors

Red Maple is constantly improving our credit card processing by adding more processors, giving you more choices and flexibility to fit your company's needs. Ask your Microsoft Dynamics™ AX partner or Red Maple for a full list of platforms.

Red Maple's Advanced Credit Cards

Red Maple's Advanced Credit Cards adds even more features and flexibility to credit card processing in Microsoft Dynamics™ AX. With features that provide streamlining of the fulfillment processes, eCommerce transactions and payment processing, Advanced Credit Cards provides even more features than Credit Card Essentials.

Conclusion

Red Maple's Credit Card Essentials for Microsoft Dynamics™ AX provides a robust and scalable solution for company's credit card processing needs. For more information, please contact your Microsoft Dynamics™ AX partner or visit us on the internet at www.redmaple.com.
